not too hard

Supplies

- 2 8mm Taj Cord End (01-0212-18)
- 6 Ant. Copper 2mm Round Bead (93-0802-08)
- 6 Oval Jump Rings 3x2mm ID (01-0016-08)
- 2 NB Copper 2mm Copper Bead Ear Wire (90-5128-11)

Size 8 and size 11 seed beads, assorted
22g craft wire
Fireline or Wildfire beading thread
3mm suede or faux suede lace in three colors (Olive, Dk. Orange, and Turquoise Micro-fiber Suede shown)
E6000 Adhesive

Required Tools

Thread cutters, flush cutters, chain nose pliers, round nose pliers, pen big eye needle, awl, scissors

Finished Size

Approx. 4 inches

Instructions

TIP: When inserting tassels into cord ends use chain nose pliers or tweezers to help tuck them inside securely.

Preparation

1. Close all oval jump rings securely.
2. Cut two 3" pieces craft wire. Set aside.
3. Cut twelve 4" pieces suede (four per color). Make a mark 1/4" from the end of each piece. Use awl to make a hole at each mark. Set aside.

Create Tassels

4. Unwind 2 ft. thread from roll. Thread needle on allowing a 2" tail. String 3–3.25" assorted seed beads and one 2mm bead. Skipping the 2mm bead pass needle back through all beads pulling enough thread through to allow a 4" tail. Remove needle.

5. Cut bead strand from roll allowing a 4" tail. String one jump ring onto the tails. Adjust thread to eliminate gaps in beads and so jump ring is close to final bead. Secure tail(s) to working thread with two overhand knots. Add a dab of adhesive to knots and allow to dry. Trim excess thread.
6. Repeat Steps 4–5 five times, varying length of beaded strand and bead pattern.
7. Make a loop in the center of one piece of wire using the widest point on round nose pliers. *Thread on one bead strand (through jump ring), then two pieces of suede.* Repeat * through * twice more, then move all strands into loop.
8. Wrap wire ends around strands to secure, keeping wrap close to top and adjusting beaded strands to keep them on outside of tassel.

Trim excess wire. Trim length of suede strands as desired. Set aside.

9. Repeat Steps 7–8.

Assemble Earrings

10. Attach one round jump ring to top of one cord end. Before closing jump ring attach one ear wire. Repeat.
11. Apply adhesive inside cord ends and insert tassels. Allow to dry.
