Faux Druzy Flora Pendant

Glass glitter and uv resin create striking mixed media components for a beautiful pendant. Add colorful ribbon or cord to complete necklace.

Design by: Tracy Proctor

skill set
not too hard

Supplies

- 1 Flora 3/4" Ring (94-3200-40)
- 1 Flora 5/8" Ring (94-3199-40)
- 1 Flora 1/2" Ring (94-3198-40)
- 1 Sm Jardin Pinch Bail (94-5807-40)
- 2 Oval Jump Ring 20ga 4x3mm ID (01-0018-70)

Iced Enamels German Glass Glitter (Sky Blue, Chartreuse and Amethyst shown) or glass glitters of choice
UV Resin such as Magic-Glos

Required Tools

1.25mm metal hole punching tool, sharp nose tweezers or toothpick, triangle bead scoop, packing tape, uv lamp, business card or small piece of card stock, tissue or paper towel

Finished Size

2 1/4 inches

Instructions

TIP: Glass glitter is sharp—handle with care! When punching holes in rings take care not to position the tool too close to the outside edge of the ring.

1. Use hole punching tool to make two holes directly across from each other in the 3/4" ring. Repeat with the 5/8" ring.
2. Punch one hole in the 1/2" ring.
3. Tear off a 1" piece of packing tape. Position tape onto back side of one ring and press down as well as possible. Place face up on business card.
4. Repeat Step 3 with remaining rings.
5. Apply enough uv resin into each ring to create a thin layer filling the bottom.
6. Use the bead scoop to add glitter into each ring. Use tweezers or toothpick to arrange glitter, adding additional resin and/or glitter sparingly if desired.
7. Place card and rings into uv lamp.
8. Allow to cure for 15–20 minutes.
9. Carefully remove tape from back of each ring. If resin is still soft place back into lamp upside down for a few more minutes until fully cured.
10. Use jump rings to connect the 3 rings.
11. Attach pinch bail at top of 3/4" ring.
12. String pendant onto ribbon or cord and finish as desired.

Watch the technique videos in the DIY section of our blog (look for Jump Rings, Hole Punching and UV Resin).
